

10 % Silicone Defoamer F/G

Characteristics	Specification
Type	Nonionic silicone emulsion
Physical Form	Free Flowing White Emulsion
Specific Gravity	1.0
pH	Neutral to slightly acidic
Solubility in Water	Water Dilutable

Description

A 10% aqueous emulsion of polydimethylsiloxane useful in controlling foam in many industrial and food processing systems. It is a relatively inert long lasting antifoam easy to dilute and disperse. It is effective over a wide range of temperature and pH conditions. Approved as a direct food additive.

Packaging

460 lb Poly Drum
