

Monocalcium Phosphate F/G V-90[®]

Characteristics	Specifications
Assay	16.8% -18.3 %
Arsenic	3 PPM Maximum
Fluoride	0.005% Maximum
Lead	2 PPM Maximum
Loss on Ignition	14.0% - 15.5%
Neutralizing Value	80 Minimum

Description

V-90[®], Monocalcium Phosphate, Anhydrous is white, granular, free-flowing powder which complies with the specifications of the Food Chemicals Codex. Each particle has a continuous coating of relatively insoluble phosphate which delays solution in aqueous liquids.

CAS Index Name

Phosphoric Acid, Calcium Salt (2:1) - European Community Grade available

Uses

Food Leavening acid for self-rising flour, self-rising corn meal, pancake flour, and prepared cake and muffin mixes.

Packaging

50.00 lb bag
