

## Titanium Dioxide Kowet USP

Characteristics	Specification
% Acid Soluble	.00 - .50
% Water Soluble	.00 - .25
Lead PPM	.00 – 10.00
% Loss on Drying	.00 -.50
% Loss on Ignition	.00 - .50
Particle Size 90%</+(microns)	1.00 – 1.70
% TIO <sub>2</sub>	99.00 – 100.50

### Description

Titanium Dioxide is an anatase titanium dioxide pigment useful in systems in which water is the dispersing medium. It is water dispersible and forms highly deflocculated suspensions. It has a blue-white color tone.

### Food Sources

Used as a whitening and filling agent or as a mineral nutrient. Found in candy as a glaze coating and a whitening agent in toothpastes.

### Packaging

110.00 lb Drum
