

## Potassium Hydroxide Flake

Characteristics	Specification
Total Alkalinity as Weight KOH	90.0% Min.
Weight K <sub>2</sub> CO <sub>3</sub>	0.44% Max.
Weight Na	0.50% Max.
KCl	150 PPM Max.
K <sub>2</sub> SO <sub>4</sub>	13 PPM Max.
Fe	3 PPM Max.
Ni	4 PPM Max.
Hg	0.1 PPM Max.

Used for soap manufacture; bleaching; electrolyte in alkaline storage batteries and some fuel cells; absorbent for carbon dioxide and hydrogen sulfide; dyestuffs; liquid fertilizers; herbicides; electroplating; mercerizing; paint removers.

Packaging: 50 lb. bag
