

Sulfuric Acid 66° 93%

Characteristics	Specification
H ₂ SO ₄	93.2% Min. – 95.0% Max.
SO ₂	50 PPM Max.
Nitrates as NO ₃	15 PPM Max.
Iron (Fe)	50 PPM Max.
Zinc (Zn)	5 PPM Max.
Mercury (Hg)	2 PPM Max.
Copper (Cu)	1 PPM Max.
Lead (Pb)	1 PPM Max.
Nickel (Ni)	1 PPM Max.
Cadmium (Cd)	1 PPM Max.
Arsenic (As)	1 PPM Max.
Chlorides (Cl)	10 PPM Max.
Clarity @ 500 nm	80% Min.
Color	40 APHA Max.

Sulfuric acid is a dense, clear-to-slightly turbid, corrosive, oily liquid, miscible with water in all proportions with evolution of heating on mixing.

It can be used for fertilizers; dyes and pigments; petroleum refining; etchant; alkylation catalyst; electroplating baths; iron and steel; rayon and film; industrial explosives; laboratory reagent; nonferrous metallurgy.

Packaging: 15 gallon carboy, 55 gallon drum, 220 gallon tote, 330 gallon tote
